Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Objections

1. Claim 6 line 2 is objected to because of the following informalities: "cavity the" is improper. Should it be "cavity, the"?

Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (4830898).

Smith (figures 1-2) shows a vehicle structural member having a body (11) with a cavity (between sides 14), plastic reinforcing ribs (21, 19) in the cavity, the body having at least one (two) outer edge (the sides 14) which comprises set back discrete region (13, slots) defining notches which open in the outer edges, the member further comprising blocks (formed by the mouldings which cover the member) that are integrally molded with the ribs, the blocks enveloping the outer edge in its set back regions and extending through the notches, the set back regions having step shapes with angles (the slots forming steps having angles in between), the set back regions being formed by cutouts in the body, the body being made of sheet metal.

Smith shows all the claimed method steps.

35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith(4830898).

Smith shows all the claimed limitations except for the set-back regions having at least some parts converging away from the body being trapezium-shaped.

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Smith to show the set-back regions having at least some parts converging away from the body being trapezium-shaped because examiner takes Official Notice of the equivalent of set-back with stepped shapes and setbacks with trapezium shaped that converge away from the body for their use in the structural art and the use of any of these known setback equivalents to encourage affixing the moulding to the body would be within the level of ordinary skill in the art.

Response to Arguments

3. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different structural member designs.
